- ▶ 2 speeds: low & high
- ▶ Retrofitting possible at any time
- ▶ Easy to clean

The new mini Condensation Hood Pro from Convotherm captures steam effectively when the unit door is opened and from the air vents - economical, powerful and easy to use.

# mini Condensation Hood Pro

The new mini Condensation Hood Pro from Convotherm brings relief and provides a better climate for staff in their demanding daily routine. This is especially the case in smaller kitchens and front-cooking areas with high throughput.

- ▶ **Fits every mini**  
The compact mini Condensation Hood Pro is available for every mini – including with a matte black finish for the mini black.
- ▶ **Economical and powerful**  
The powerful mini Condensation Hood Pro operates with a high degree of efficiency with no annoying background noise. It is also impressive in terms of energy efficiency thanks to its economical standby mode during the cooking process.
- ▶ **Makes work easier**  
With simple operation, straightforward cleaning and very convenient and fast replacement of the grease filter, the mini Condensation Hood Pro lightens the load for users' everyday work routine.
- ▶ **Creates a perfect climate**  
The front extraction begins extracting vapors even before the door is opened. That creates a much more pleasant room climate in the kitchen.
